

## Design and technology come together to celebrate Corvette's past, present and future

October 30, 2009

**DETROIT** – Chevrolet delivers a futuristic vision of technology and design with the 50th Anniversary Corvette Stingray Concept. A version of the model was first shown at the 2009 Chicago Auto Show and stars as “Sideswipe” in Transformers: Revenge of the Fallen. The Corvette Stingray Concept represents both the iconic legacy and an exciting future for Corvette.

The Corvette Stingray Concept was developed as an internal design challenge to combine classic Corvette cues with surprisingly high-tech features, modern materials, and a striking new appearance. The car is well-appointed with a clamshell hood, scissor-style doors, ergonomic seats, rear-view camera with night vision enhancement, and a high performance hybrid drive. Interactive touch controls allow the driver to customize the power and efficiency of his or her ride and share it with friends via the in-car camera system and advanced telematics.
